EDUCATION

PRESIDENT RAMON MAGSAYSAY STATE UNIVERSITY — Zambales, Philippines
BS Information Technology | GWA: 1.94 — 2025
Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Web & Mobile Development

WORK EXPERIENCE

SANYO DENKI PHILIPPINES INC. (Japanese Manufacturing Company) — Subic, Zambales
Software Engineer / Full Stack Developer — Aug 2025 – Present

- Designed and deployed an IoT Engineering Dashboard connecting 9 Keyence PLC machines and a Raspberry Pi 5 to a real-time web interface, adopted by engineering personnel across multiple production lines.
- Independently built YUDOO Web, a full-stack manufacturing workstation application deployed on a live production line, replacing paper-based work instructions with digital process instructions, PLC polling, real-time SignalR updates, daily logging, and output monitoring.
- Architected and deployed the SMD Tower (Tape & Reel Cabinet) management system from scratch, now in active production use — cutting component retrieval time from 3–5 minutes to under a minute (up to 50% faster) and eliminating manual mismatch errors from the prior paper-based process.
- Built and maintained full-stack web applications using ASP.NET Core Web API and React (TypeScript), applying Clean Architecture and RESTful design principles for scalable, maintainable systems.

PRESIDENT RAMON MAGSAYSAY STATE UNIVERSITY (R&D Office) — Iba, Zambales
Software Engineer Intern — Jan 2025 – May 2025

- Contributed to the development and maintenance of a web application built on ASP.NET Core, React, and SQL Server.
- Collaborated with a cross-functional intern team to design and implement new features, resolve bugs, and improve application performance by 30%.
- Developed and tested RESTful APIs enabling seamless frontend–backend integration.

PROJECTS

IOT ENGINEERING DASHBOARD — 2025
ASP.NET Core MVC · Razor · MSSQL

- Real-time factory monitoring dashboard integrating 9 Keyence PLC machines and a Raspberry Pi 5 — delivering live equipment status, anomaly alerts, and operational reporting across multiple production lines.

SMD TOWER – TAPE & REEL CABINET SYSTEM — 2025
ASP.NET Core Web API · React · TypeScript · MSSQL

- Inventory and logistics system for SMD component management, built and deployed at Sanyo Denki Philippines — cutting component retrieval time from 3–5 minutes to under a minute.

YUDOO WEB – MANUFACTURING WORKSTATION APP — 2026
ASP.NET Core Web API · React · TypeScript · MSSQL

- Full-stack manufacturing workstation application with digital process instructions, a PLC polling service, real-time station updates via SignalR, daily logging, output monitoring, and user management.

ADDITIONAL

Technical Skills: C#, ASP.NET Core MVC/Web API, React, Next.js, TypeScript, JavaScript, SQL Server, PostgreSQL, Entity Framework Core, REST APIs, SignalR, Git/GitHub, Clean Architecture, Agile

Familiar With: Node.js, Python, PHP, MySQL, Tailwind CSS, Azure Functions, Azure Blob Storage

IoT & Industrial: Keyence PLC integration, SCADA-style dashboards, real-time monitoring systems, industrial automation

Certificates: Foundational C# with Microsoft (freeCodeCamp); ASP.NET Core MVC, Python, SQL, JavaScript (TestDome)
